

Life Sciences Seminar

Integrating tissue and positional identity during regeneration

Elly Tanaka (IMP, Vienna)

Host: Ani Kicheva

Salamander limb regeneration is a wonderful example of how tissues coordinate cell type identity with positional information to govern appropriate patterning. We have been working on understanding extracellular cues that initiate regeneration, which cells respond, and how differences in positional identity and signalling centers are used to elicit limb regeneration.

Tuesday, March 6, 2018 01:00pm - 02:30pm
IST Austria Campus Seminar Room, Lab Building East

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage: <https://ist.ac.at/en/campus/how-to-get-here/> The IST Shuttle bus is marked IST Shuttle (#142) and has the Institute Logo printed on the side.
