Orbifold Mordell over function fields

Arne Smeets (Radboud University)

Host: Timothy Browning

I will introduce Campana's "orbifold pairs", in particular the 1-dimensional version, and explain how to formulate a version of Mordell's conjecture for such pairs. Over number fields, proving such a statement seems out of reach: all we know is that it would follow from the abc conjecture (as I will explain). Over function fields however, such a result can actually be proven, both in characteristic zero and in positive characteristic; I will give an overview of the proof and the techniques involved. (Joint work with Stefan Kebekus and Jorge Vitorio Pereira.)

Tuesday, November 13, 2018 01:00pm - 03:00pm

IST Austria Campus Big Seminar room Ground floor / Office Bldg West (I21.EG.101)

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage: http://ist.ac.at/fileadmin/user_upload/pdfs/IST_shuttle_bus.pdf The IST Shuttle bus is marked IST Shuttle (#142) and has the Institute Logo printed on the side.
