# Crossing probabilities of multiple Ising interfaces

**Eveliina Peltola (Université de Genève)**

**Host: M. Beiglböck, N. Berestycki, L. Erdős, J. Maas**

I discuss crossing probabilities of multiple interfaces in the critical Ising model with alternating boundary conditions. In the scaling limit, they are conformally invariant expressions given by so-called pure partition functions of multiple SLE( $\kappa$ ) with  $\kappa=3$ . I also describe analogous results for critical percolation and the Gaussian free field.

This is joint work with Hao Wu (Yau Center / Tsinghua University).

**Tuesday, February 12, 2019 05:30pm - 06:30pm**

IST Austria Campus Uni Wien HS 11, 2. OG, OMP 1

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage: [http://ist.ac.at/fileadmin/user\\_upload/pdfs/IST\\_shuttle\\_bus.pdf](http://ist.ac.at/fileadmin/user_upload/pdfs/IST_shuttle_bus.pdf) The IST Shuttle bus is marked IST Shuttle (#142) and has the Institute Logo printed on the side.
