

Mathematics and CS Seminar

Optimal Transport and Density Functional Theory

Mathieu Lewin

Universite Paris-Dauphine

Host: Robert Seiringer

In this talk I will explain the role of Optimal Transport in Density Functional Theory, the main method used by quantum chemists and physicists to compute the state of quantum electrons at the microscopic scale. I will review some recent mathematical advances in this theme and mention some open problems.

Thursday, April 25, 2019 03:45pm - 04:45pm

Erwin Schrödinger Institute (ESI) in Vienna

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: <https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
