

Life Sciences Seminar

Neural Computations for Vision

Markus Meister (Caltech, Division of Biology and Biological Engineering)

Host: Maximilian Jösch

The task of the visual system is to extract from the onslaught of raw image information (~1 Gbit/s) the little knowledge that really matters to us (~20 bit/s). I will discuss what we are learning about this process in the early neural circuits of the visual system, and how the resulting insights can help devise prostheses for the blind.

Thursday, June 13, 2019 11:00am - 12:00pm

IST Austria Campus Mondi Seminar Room 2, Central Building

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage: <https://ist.ac.at/en/campus/how-to-get-here/> The IST Shuttle bus is marked IST Shuttle (#142) and has the Institute Logo printed on the side.
