Algebraic groups acting birationally on the plane

Susanna Zimmermann (Université d'Angers, France)

Host: Tim Browning

There are many algebraic groups acting birationally on the projective plane, and I'm interested in those that are not finite. It turns out that, up to conjugacy and inclusion, there are only finitely many families of such groups. In this talk I'd like to explain how to obtain their classification over any perfect field.

Thursday, November 18, 2021 01:00pm - 02:00pm

IST Austria Campus Heinzl Seminar Room (I21.EG.101), Office Building West

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage: <https://ist.ac.at/en/campus/how-to-get-here/> The IST Shuttle bus is marked IST Shuttle (#142) and has the Institute Logo printed on the side.
