

Institute colloquium

CANCELLED: Puzzles about trees, high dimensions, election, computation and noise

Gil Kalai (The Hebrew University of Jerusalem)

Host: Uli Wagner

In the lecture, Gil Kalai will talk about some mathematical puzzles that have preoccupied him over the years, and he will also reveal to young people in the audience some of the secrets of the trade. The first puzzle is about high dimensional trees: what they are and how to count them. The second puzzle deals with high dimensional geometric bodies, and a question of Borsuk. The third puzzle is about errors in counting votes in elections, and the fourth puzzle is: are computationally superior quantum computers feasible?

Monday, June 11, 2018 04:00pm - 05:00pm

IST Austria Campus Raiffeisen Lecture Hall, Central Building

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage: <https://ist.ac.at/en/campus/how-to-get-here/> The IST Shuttle bus is marked IST Shuttle (#142) and has the Institute Logo printed on the side.
